P.S. index

VOLUME XXXII—1987

A

Accident analysis for prevention: The role of the human factors specialist in accident reconstruction. *Stanley D. Pulz.* Feb. p. 38

Accident trend analysis by cumulative rates calculation. *Matthias J. Kotowski.* Dec. p. 15

Applications of system safety at Ontario Hydro. *David M. Haynes.* June p. 39

Applying the system safety concept to control confined-space entry hazards. *Richard E. Pearson.* May p. 28

Are you using your local fire department wisely? *Jack Abraham, Jr.* April p. 24

Automating your risk management program. *William English.* Feb. p. 49

C

Civil and criminal law liability exposure of the safety professional. *Gregory S. Pokrass.* April p. 10

Community involvement in emergency plans for chemical facilities. *Carolyn C. Burns and Donald W. Bell,* July p. 11

Control of low back pain using ergonomic task redesign techniques. *John D. Benson.* Sept. p. 21

Corporate system of safety management, A. *Jerry L. Williams.* Aug. p. 18

Crisis management: Handling public relations in a disaster. *Michael W. Mitchell.* Jan. p. 28

D

Division safety coordinators sell safety . . . breaking down internal barriers to corporate safety programs. *Robert E. Downey.* April p. 18

Driver records predict accidents. *Robert E. Bonner.* Nov. p. 28

F

Fleet safety fundamentals. *Thomas W. Werner.* Nov. p. 27

H

HIT—high incidence training for safety. *Alice Bly Gausch and Sally A. Esson.* July p. 26

How to secure an effective health and safety program at work. *Sandra Dawson, Philip Poynter and David Stevens.* Jan. p. 32

Hyperthermia: The hidden cause: Investigating industrial accidents with heat stress as a proximate cause. *A. J. Scardino, Jr. March p. 26*

I

Implementing a safety program—A successful start. *Guy Fragala.* June p. 16

Integration of safety and health into business and engineering school curricula. *John T. Talty and James B. Walters.* Sept. p. 26

L

Lawyer's perspective on accident investigations, A. *Thao Tiedt and Roger Kindley.* Aug. p. 11

Long-term health hazards and short-term enforcement. *Henry Chajet and Bernard R. Roy.* May p. 22

Lost profits: The hidden costs of accidents in the workplace. *Frank D. Celebrezze.* Jan. p. 25

M

Managing a plant dispensary. *by Stephen V. Magyar, Jr.* Jan. p. 49

Middle management: The missing link? *Richard G. Morrison.* Nov. p. 13

N

Nervous system: Early detection for chemical hazards. *Raymond Singer.* March p. 37

Numbers in safety: Is what you see what you really get? *Terence E. Meehan.* Oct. p. 17

O

Occupational health issues: The 21st century. *R. Leonard Vance.* July p. 23

On-site exercise program to prevent carpal tunnel syndrome, An. *Kenny Sawyer.* May p. 17

OSHA recordkeeping—Are you ready? *David F. Coble,* Dec. p. 20

Oxygen safety. *Kenneth B. Turner.* Jan. p. 13

P

PCB's in electrical equipment—A growing concern. *Forrest R. Alderman.* May. p. 13

Power and influence for the safety and health professional. *Ted Ferry.* Sept. p. 18

Power press safeguarding: A human factors perspective. *Joseph P. Ryan.* Aug. p. 23

Practical evaluation of hot working areas. *Jerry D. Ramsey.* Feb. p. 42

Proposed national strategy for the prevention of severe occupational traumatic injuries, A. *National Institute for Occupational Safety and Health.* Dec. p. 26

Q

Quality revolution: Threat or boon to safety professionals? The. *Edward E. Adams.* Oct. p. 13

R

Rational approach to performance. *Paul Knipping, Edward Burkhardt and John Cobb.* Feb. p. 24

S

Safety and operations procedures for handling dioxins and other chemical toxicants. *Gary L. Myers and Donald G. Patterson.* June p. 30

Safety and quality: The human dimension. *Roland Dumas.* Dec. p. 11

Safety by the book: Developing useful program reference manuals. *Raymond L. Kuhlman.* July p. 16

Safety director in the land of business, A. *Richard G. Hughes.* March p. 22

Safety professional must be a communicator, The. *Rick Cumming III.* March p. 17

Safety professional needs legal workplace protection, The. *Barbara Pfeffer Billauer.* Oct. p. 38

SEI provides critical certification role. *David E. Miller.* June p. 13

Simple redesign strategy for storage of heavy objects, A. *Charles K. Anderson and Mary Jo Catterall.* Nov. p. 35

Smoking—the nation's number one cause of death! *Gardell H. Powell.* Oct. p. 20

T

Times and treatments change in back care. *George W. Lawn.* April p. 28

U

Underground storage tanks: Tank owner's survival guide. *Rich Cross.* Sept. p. 13

W

Who says we can't fix it? Neuromusculoskeletal disorders. *Donald J. Eckenfelder.* Aug. p. 27

Will process inertia defeat your fail-safe devices? *Don Kase and Kay Wiese.* April p. 14

Women in the workplace. *Judith Erickson.* Feb. p. 30

Work injuries and smoking habits—Are they related? *Albert Metts and Raymond A. Mill.* Jan. p. 42

Workers/rescuers continue to die in confined spaces. *Ted A. Pettit, Lee M. Sanderson and Herbert I. Linn.* Feb. p. 15

PS SUBJECT INDEX—1987

FIRE PROTECTION

Planning for Fire Safety

Are you using your local fire department wisely? *by Jack Abraham, Jr.*, April, pp. 24-26.
Simple redesign strategy for storage of heavy objects, A, *by Charles K. Anderson and Mary Jo Catterall*, November, pp. 35-38.

MANAGEMENT ASPECTS

Accident Investigation and Analysis

Accident analysis for prevention: The role of the human factors specialist in accident reconstruction *by Stanley D. Pulz*, February, pp. 38-41.
Accident trend analysis by cumulative rates calculation *by Mathias J. Kotowski*, December, pp. 15-18.
Lawyer's perspective on accident investigations, A, *by Thao Tiedt and Roger Kindley*, August, pp. 11-17.
Lost profits: The hidden costs of accidents in the workplace *by Frank D. Celebrezze*, January, pp. 25-27.
Numbers in safety: Is what you see what you really get? *by Terence E. Meehan*, October, pp. 17-19.

Administration of Safety and Health Management

Corporate system of safety management, A, *by Jerry L. Williams*, August, pp. 18-22.
Division safety coordinators sell safety . . . breaking down internal barriers to corporate safety programs *by Robert E. Downey*, April, pp. 18-20.
Middle management: The missing link? *by Richard G. Morrison*, November, pp. 13-16.
Power and influence for the safety and health professional *by Ted Ferry*, September, pp. 18-20.
Safety director in the land of business, A, *by Richard G. Hughes*, March, pp. 22-23.
SEI provides critical certification role *by David E. Miller*, June, pp. 13-15.

Disasters

Crisis management: Handling public relations in a disaster *by Michael W. Mitchell*, January, pp. 28-31.
Community involvement in emergency plans for chemical facilities *by Carolyn C. Burns and Donald W. Bell*, July, pp. 11-15.

Fleet Management

Driver records predict accidents *by Robert E. Bonner*, November, pp. 28-31.
Fleet safety fundamentals *by Thomas W. Werner*, November, pp. 27-30.

Professional Liability

Safety professional needs legal workplace protection, The, *by Barbara Pfeffer Billauer*, October, pp. 38-42.

Program Development

Automating your risk management program *by William English*, February, pp. 49-52.
HIT—high incidence training for safety *by Alice Bly Gausch and Sally A. Esson*, July, pp. 26-28.
How to secure an effective health and safety program at work *by Sandra Dawson, Philip Poynter and David Stevens*, January, pp. 32-41.
Implementing a safety program—A successful start *by Guy Fragala*, June, pp. 16-19.
Managing a plant dispensary *by Stephen V. Magyar, Jr.*, January, pp. 49-56.
Rational approach to performance *by Paul Knipping, Edward Burkhardt and John Cobb*, February, pp. 24-28.
Safety and quality: The human dimension *by Roland Dumas*, December pp. 11-14.
Safety by the book: Developing useful program reference manuals *by Raymond L. Kuhlman*, July, pp. 16-22.

Risk Management/Loss Control

Application of system safety at Ontario Hydro *by David M. Haynes*, June, pp. 39-42.
Civil and criminal law liability exposure of the safety professional *by Gregory S. Pokrass*, April, pp. 10-13.
Quality revolution: Threat or boon to safety professionals? The, *by Edward E. Adams*, October, pp. 13-16.

Safety Training and Education

Integration of safety and health into business and engineering school curricula *by John T. Talty and James B. Walters*, September, pp. 26-32.
Safety professional must be a communicator, The, *by Rick Cumming III*, March, pp. 17-21.

OCCUPATIONAL HEALTH/INDUSTRIAL HYGIENE

Health Hazards in the Workplace

An on-site exercise program to prevent carpal tunnel syndrome *by Kenny Sawyer*, May, pp. 17-20.
Control of low back pain using ergonomic task redesign techniques *by John D. Benson*, September, pp. 21-25.
Hyperthermia: The hidden cause: Investigating industrial accidents with heat stress as a proximate cause *by A. J. Scardino, Jr.*, March, pp. 26-29.
Long-term health hazards and short-term enforcement *by Henry Chajet and Bernard R. Roy*, May, pp. 22-25.
Nervous system: Early detection for chemical hazards *by Raymond Singer*, March, pp. 37-41.
Occupational health issues: The 21st century *by R. Leonard Vance*, July, pp. 23-25.
Practical evaluation of hot working areas *by Jerry D. Ramsey*, February, pp. 42-48.
Smoking—the nation's number one cause of death! *by Gardell H. Powell*, October, pp. 20-24.
Times and treatments change in back care *by George W. Lawn*, April, pp. 28-32.
Who says we can't fix it? Neuromusculoskeletal disorders *by Donald J. Eckenfelder*, August, pp. 27-30.
Women in the workplace *by Judith Erickson*. February, pp. 30-37.

Work injuries and smoking habits—Are they related? *by Albert Metts and Raymond A. Mill,* January, pp. 42-48.

OCCUPATIONAL SAFETY

Confined Spaces

Applying the system safety concept to control confined-space entry hazards *by Richard E. Pearson,* May, pp. 28-30.
Workers/rescuers continue to die in confined spaces *by Ted A. Pettit, Lee M. Sanderson and Herbert I. Linn,* February, pp. 15-22.

Electrical

PCB's in electrical equipment—A growing concern *by Forrest R. Alderman,* May, pp. 13-16.

Hazardous Materials

Oxygen safety *by Kenneth B. Turner,* January, pp. 13-16.
Safety and operations procedures for handling dioxins and other chemical toxicants *by Gary L. Myers and Donald G. Patterson,* June, pp. 30-37.
Underground storage tanks: Tank owner's survival guide *by Rich Cross,* September, pp. 13-17.

Machinery

Power press safeguarding: A human factors perspective *by Joseph P. Ryan,* August, pp. 23-26.
Will process inertia defeat your fail-safe devices? *by Don Kase and Kay Wiese,* April, pp. 14-17.

GOVERNMENT AGENCIES

A proposed national strategy for the prevention of severe occupational traumatic injuries, *National Institute for Occupational Safety and Health,* December, pp. 26-36.

OSHA

OSHA recordkeeping—Are you ready? *by David F. Coble,* December pp. 20-24.
